

## Guidelines for Video Board

Dimensions – 450x1080px

Resolution – 300dpi

RGB only

Text must be bold and big. The further away from the sign the better it looks. The goal is to have text that is big enough to read from far away, and to not have too much text.

-text is clear and large, dark background, light text, simple and clear

Bad example: Text will be too hard to read, not large enough and not bold enough, text color is too close to background color, Redeemer R logo will be too small to read, the only thing that will be readable will be "If:2022"
